Planning moves in later life

A study on planning to move in later life is based on the notion that people will need to move regardless. If this is the case, the question becomes, who does the planning? The researchers are taking medical approach in two ways. First, by suggesting older people should be encouraged to plan their move. Second healthcare professionals can "help them ...

Older road users and pedestrians

As the share of older road users increases it's important to pay more attention to their safety as road users and pedestrians. Transport planners have to draw together urban design, street and road design as well as traffic signal technology. This makes the design landscape crowded with regulations and competing interests between vehicles and people. The mobility and road safety ...

Post-occupancy evaluation tool

Academics like to approach the issue of exclusion by developing guides, tools, and playbooks. But are evaluation tools useful for promoting inclusive design in the built environment? Perhaps. From the Inclusive Design Team in the UK comes a post-occupancy evaluation tool. That is, a tool to find out if the design actually works. Existing post occupancy tools usually focus on ...
