### Co-design and citizen science

Co-design is a term that emerged in the field of accessible and inclusive design. But co-design methods have been around for a long time in one form or another. Academics will recognise this as Participatory Action Research. Citizen science is a version of co-design that has its roots in environmental monitoring. This method is now used in urban planning and ...

### Young people and digital exclusion

Much is discussed about older people and digital exclusion, but this ageist thinking leaves young people out of the discussion. Hence the stereotype of young people being more digitally literate than older cohorts. Not all young people or older people are all the same. Often they have more in common than not. Access to digital devices and digital news and ...

### Active travel design

The aim of South Australia's Active Travel Design Guide is to provide design principles for a more inclusive and sustainable future for all who walk and wheel. However, the guide could have benefitted from more than one page on accessibility. "This Guide aims to enhance design outcomes for people walking and wheeling, simplifying the process of designing for active travel ...

## Universal design in housing: making it happen

Basic access features are now mandated in the latest edition of the Australian National Construction Code (NCC). This achievement took 20 years of dedicated advocacy for universal design in housing. This was achieved against the backdrop of strong housing industry lobbying for the status quo which still remains even with states that have agreed to adopt it. Other countries are experiencing the same problems. This post includes a new research paper from Ireland which covers the issues and challenges, and includes costings and worked examples.

## Age Friendly Communities Handbook

From Norway comes an Age Friendly Communities Handbook that presents information in easy to consume formats. Norway has been driving a universal design agenda through national and local government since 1999. Norway's key document for this is Norway Universally Designed 2025. This Handbook fits nicely within that framework but with an emphasis on an ageing population. It covers the key steps in the planning cycle, aspects to consider in built design, transport, housing and social participation. Pre-requisites for age-friendly development are co-creation and communication.

## Ageing in place, ageing *and* place

Ageing in place and ageing and place are intertwined but distinct. Both place and home need to support people as they age - one is insufficient without the other. Generally, ageing in place means 'staying put'. That can mean the staying in the same home or staying in the same community or neighbourhood. Research with older people suggests that ageing in place is more nuanced than just a home or neighbourhood. It's also about personal and cultural values, priorities and connections to people and places.

## Model Universal Design Position Statement

CUDA has devised a model document to help organisations develop their own universal design policy or statement. The CUDA Universal Design Position Statement covers all the basics in a straightforward way. At the end of the document, organisations can insert links to their own policy documents that relate to the position statement. There's a one page plain language version too.
