### Risk factors: climate and later age

In the age of climate change Australians are reassessing the risk of floods, fires and severe storms on their homes. But what about assessing the risk of capabilities in later age in home design? Perhaps they should be assessing both. Any proposed renovations should consider both climate and later age to ensure a safe and secure home into the future. ...

### Design for people with low vision

People with low vision cannot correct their eyesight with glasses, contact lenses, medication or surgery. While low vision can begin at any age, the likelihood increases once people reach 65 years. The Australian Institute of Architects has a web resource about designing for low vision. The resource explains the different types of low vision caused by various conditions such as ...

### Streets for All

Continuous footways and bus stop bypasses are of particular concern to people with reduced mobility and vision. Living Streets and Transport for All in the UK ran a two year project on the issues. The research uncovered the issues and found ways to improve the impact of these features on streetscape accessibility. Streets for people with disability means safer and ...

## [Passwords and older people](#)

Is it harder for older people to create and track passwords than younger people? Maybe not. But there could be a difference in the way the two groups deal with the issues. A research study comparing a group of older people with a group of younger people provided surprising results. Older people had no problem creating and remembering passwords because ...

## [Bus stops: pedestrians and cyclists](#)

We are all encouraged to leave the motor car at home and walk or cycle. However, road and street infrastructure was built at a time when vehicle movements were the focus. That means a lot of retrofitting and work-arounds are needed now. The intersection of bus stops, pedestrians and cyclists is a good example of this vexed issue. The Living Streets ...

## [A neurodiverse perspective](#)

Mollie Pittaway gives a neurodiverse perspective on the world in a Medium magazine article. She describes 10 ways autistic people are different to neurotypical people. She makes it clear in the beginning that she doesn't speak for all autistic people. Pittaway just wants to emphasise cultural differences. Understanding these differences are useful in the workplace for managing and interacting with ...

## Livable Housing Design course

This short course is tailor-made for professionals in the housing and home mods sectors seeking an understanding of the NCC requirements for Livable Housing Design Standard. It delves into the technical details of both the new standard and the enhanced standard. The enhanced standard, similar to the Gold level of Livable Housing Design Guidelines, is good for anyone doing home modifications, or thinking about it. **Only \$35.00 inc GST.**

*CUDA presents this course under licence from the Australian Building Codes Board.*
